

May 3rd Open House questions:

Will the development contractor contact mover so one business does all the moving?

It will be critical for the development contractor to have contact with the house mover but, while it would save duplication of services, there is no requirement that only one moving company move all the homes awarded through this RFP process.

Have the homes been tested for asbestos and lead?

Yes, both lead and asbestos have been found in trace amounts. See the attached report, entitled PHA Phase 1 AHERA Survey Report 161006, identifying locations and amounts.

Are building permits necessary?

The City of Port Angeles has a permit process to move buildings within and outside of the city limits. Contact the Department of Economic and Community Development for more information. In addition, the jurisdiction where the home is being moved to may have permit requirements as well. It is the responsibility of the successful proposer to secure the necessary permits for moving.
