

Chapter 8
HOUSING QUALITY STANDARDS AND RENT REASONABLENESS
DETERMINATIONS

[24 CFR 982 Subpart I and 24 CFR 982.507]

INTRODUCTION

HUD requires that all units occupied by families receiving Housing Choice Voucher (HCV) assistance meet HUD's Housing Quality Standards (HQS) and permits the PHA to establish additional requirements. The use of the term "HQS" in this plan refers to the combination of both HUD and PHA-established requirements. HQS inspections are required before the Housing Assistance Payments (HAP) Contract is signed and at least annually during the term of the contract.

HUD also requires PHAs to determine that units rented by families assisted under the HCV program have rents that are reasonable when compared to comparable unassisted units in the market area.

This chapter explains HUD and PHA requirements related to housing quality and rent reasonableness as follows:

Part I. Physical Standards. This part discusses the physical standards required of units occupied by HCV-assisted families and identifies decisions about the acceptability of the unit that may be made by the family based upon the family's preference. It also identifies life-threatening conditions that must be addressed on an expedited basis.

Part II. The Inspection Process. This part describes the types of inspections the PHA will make and the steps that will be taken when units do not meet HQS.

Part III. Rent Reasonableness Determinations. This part discusses the policies the PHA will use to make rent reasonableness determinations.

Special HQS requirements for homeownership, manufactured homes, and other special housing types are discussed in Chapter 15 to the extent that they apply in this jurisdiction.

PART I: PHYSICAL STANDARDS

8-I.A. GENERAL HUD REQUIREMENTS

HUD Performance and Acceptability Standards

HUD's performance and acceptability standards for HCV-assisted housing are provided in 24 CFR 982.401. These standards cover the following areas:

- Sanitary facilities
- Food preparation and refuse disposal
- Space and Security
- Thermal Environment
- Illumination and electricity
- Structure and materials
- Interior Air Quality
- Water Supply
- Lead-based paint
- Access
- Site and neighborhood
- Sanitary condition
- Smoke Detectors

A summary of HUD performance criteria is provided in Attachment 8-1. Additional guidance on these requirements is found in the following HUD resources:

- Housing Choice Voucher Guidebook, Chapter 10.
- HUD Housing Inspection Manual for Section 8 Housing
- HUD Inspection Form, form HUD-52580 (3/01) and Inspection Checklist, form HUD-52580-A (9/00)
- HUD Notice 2003-31, Accessibility Notice: Section 504 of the Rehabilitation Act of 1973; the Americans with Disabilities Act of 1990; the Architectural Barriers Act of 1968 and the Fair Housing Act of 1988.

Tenant Preference Items

HUD requires the PHA to enforce minimum HQS but also requires that certain judgments about acceptability be left to the family. For example, the PHA must ensure that the unit contains the required sanitary facilities, but the family decides whether the cosmetic condition of the facilities is acceptable. Attachment 8-2 summarizes those items that are considered tenant preferences.

Modifications to Provide Accessibility

Under the Fair Housing Act of 1988 an owner must not refuse the request of a family that contains a person with a disability to make necessary and reasonable modifications to the unit. Such modifications are at the family's expense. The owner may require restoration of the unit to its original condition if the modification would interfere with the owner or next occupant's full enjoyment of the premises. The owner may not increase a customarily required security deposit. However, the landlord may negotiate a restoration agreement that requires the family to restore the unit and, if necessary to ensure the likelihood of restoration, may require the tenant to pay a

reasonable amount into an interest bearing escrow account over a reasonable period of time. The interest in any such account accrues to the benefit of the tenant. The owner may also require reasonable assurances that the quality of the work will be acceptable and that any required building permits will be obtained.[24 CFR 100.203; Notice 2003-31].

Modifications to units to provide access for a person with a disability must meet all applicable HQS requirements and conform to the design, construction, or alteration of facilities contained in the UFAS and the ADA Accessibility Guidelines (ADAAG) [28 CFR 35.151(c) and Notice 2003-31] See Chapter 2 of this plan for additional information on reasonable accommodations for persons with disabilities.

PHA Policy

Any owner that intends to negotiate a restoration agreement or require an escrow account must submit the agreement(s) to the PHA for review.

8-I.B. ADDITIONAL LOCAL REQUIREMENTS

The PHA may impose additional quality standards as long as the additional criteria are not likely to adversely affect the health or safety of participant families or severely restrict housing choice. HUD approval is required if more stringent standards are imposed. HUD approval is not required if the PHA additions are clarifications of HUD's acceptability criteria or performance standards [24 CFR 982.401(a)(4)].

Thermal Environment [HCV GB p.10-7]

The PHA must define a “healthy living environment” for the local climate. This may be done by establishing a temperature that the heating system must be capable of maintaining, that is appropriate for the local climate.

PHA Policy

The heating system must be capable of maintaining an interior temperature of 65 degrees Fahrenheit between October 1 and May 1.

Clarifications of HUD Requirements

PHA Policy

As permitted by HUD, the PHA has adopted the following specific requirements that elaborate on HUD standards.

Walls

In areas where plaster or drywall is sagging, severely cracked, or otherwise damaged, it must be repaired or replaced.

Windows

Window sashes must be in good condition, solid and intact, and properly fitted to the window frame. Damaged or deteriorated sashes must be replaced.

Windows must be weather-stripped as needed to ensure a weather-tight seal.

Doors

All exterior doors must be weather-tight to avoid any air or water infiltration, be lockable, have no holes, have all trim intact, and have a threshold.

Floors

All wood floors must be sanded to a smooth surface and sealed. Any loose or warped boards must be resecured and made level. If they cannot be leveled, they must be replaced.

Security

If window security bars or security screens are present on emergency exit windows, they must be equipped with a quick release system. The owner is responsible for ensuring that the family is instructed on the use of the quick release system.

8-I.C. LIFE THREATENING CONDITIONS [24 CFR 982.404(a)]

HUD requires the PHA to define life threatening conditions and to notify the owner or the family (whichever is responsible) of the corrections required. The responsible party must correct life threatening conditions within 24 hours of PHA notification.

PHA Policy

The following are considered life threatening conditions:

Any condition that jeopardizes the security of the unit

Major plumbing leaks or flooding, waterlogged ceiling or floor in imminent danger of falling

Natural or LP gas or fuel oil leaks

Any electrical problem or condition that could result in shock or fire

Absence of a working heating system when outside temperature is below 60 degrees Fahrenheit

Utilities not in service, including no running hot water

Conditions that present the imminent threat to health and safety

Obstacles that prevent safe entrance or exit from the unit

Absence of a functioning toilet in the unit

Absence of a functioning smoke detector in the unit

Missing or inoperable carbon monoxide detector

If an owner fails to correct life threatening conditions as required by the PHA, the housing assistance payment will be abated and the HAP contract will be terminated. See 8-II-G.

If a family fails to correct a family caused life threatening condition as required by the PHA, the PHA may terminate the family's assistance. See 8-II.H.

The owner will be required to repair an inoperable smoke detector unless the PHA determines that the family has intentionally disconnected it (by removing batteries or other means). In this case, the family will be required to repair the smoke detector within 24 hours.

8-I.D. OWNER AND FAMILY RESPONSIBILITIES [24 CFR 982.404]

Family Responsibilities

The family is responsible for correcting the following HQS deficiencies:

- Tenant-paid utilities not in service
- Failure to provide or maintain family-supplied appliances
- Damage to the unit or premises caused by a household member or guest beyond normal wear and tear. "Normal wear and tear" is defined as items which could not be charged against the tenant's security deposit under state law or court practice.

Owner Responsibilities

The owner is responsible for all HQS violations not listed as a family responsibility above, even if the violation is caused by the family's living habits (e.g., vermin infestation). However, if the family's actions constitute a serious or repeated lease violation the owner may take legal action to evict the family.

8-I.E. SPECIAL REQUIREMENTS FOR CHILDREN WITH ENVIRONMENTAL INTERVENTION BLOOD LEAD LEVEL [24 CFR 35.1225]

If a PHA is notified by a public health department or other medical health care provider, or verifies information from a source other than a public health department or medical health care provider, that a child of less than 6 years of age, living in an HCV-assisted unit has been identified as having an environmental intervention blood lead level, the PHA must complete a risk assessment of the dwelling unit. The risk assessment must be completed in accordance with program requirements, and the result of the risk assessment must be immediately provided to the owner of the dwelling unit. In cases where the public health department has already completed an evaluation of the unit, this information must be provided to the owner.

Within 30 days after receiving the risk assessment report from the PHA, or the evaluation from the public health department, the owner is required to complete the reduction of identified lead-based paint hazards in accordance with the lead-based paint regulations [24 CFR 35.1325 and 35.1330]. If the owner does not complete the "hazard reduction" as required, the dwelling unit is in violation of HQS and the PHA will take action in accordance with Section 8-II.G.

PHA reporting requirements, and data collection and record keeping responsibilities related to children with an environmental intervention blood lead level are discussed in Chapter 16.

8-I.F. VIOLATION OF HQS SPACE STANDARDS [24 CFR 982.403]

If the PHA determines that a unit does not meet the HQS space standards because of an increase in family size or a change in family composition, the PHA must issue the family a new voucher, and the family and PHA must try to find an acceptable unit as soon as possible. If an acceptable unit is available for rental by the family, the PHA must terminate the HAP contract in accordance with its terms.

PART II: THE INSPECTION PROCESS

8-II.A. OVERVIEW [24 CFR 982.405]

Types of Inspections

The PHA conducts the following types of inspections as needed. Each type of inspection is discussed in the paragraphs that follow.

- *Initial Inspections.* The PHA conducts initial inspections in response to a request from the family to approve a unit for participation in the HCV program. The unit must pass the HQS inspection before the effective date of the HAP Contract.
- *Annual Inspections.* HUD requires the PHA to inspect each unit under lease at least annually to confirm that the unit still meets HQS. The inspection may be conducted in conjunction with the family's annual reexamination but also may be conducted separately.
- *Special Inspections.* A special inspection may be requested by the owner, the family, or a third party as a result of problems identified with a unit between annual inspections.
- *Quality Control Inspections.* HUD requires that a sample of units be reinspected by a supervisor or other qualified individual to ensure that HQS are being enforced correctly and uniformly by all inspectors.

Inspection of PHA-owned Units [24 CFR 982.352(b)]

The PHA must obtain the services of an independent entity to perform all HQS inspections in cases where an HCV family is receiving assistance in a PHA-owned unit. A PHA-owned unit is defined as a unit that is owned by the PHA that administers the assistance under the consolidated ACC (including a unit owned by an entity substantially controlled by the PHA). The independent agency must communicate the results of each inspection to the family and the PHA. The independent agency must be approved by HUD, and may be the unit of general local government for the PHA jurisdiction (unless the PHA is itself the unit of general local government or an agency of such government).

Inspection Costs

The PHA may not charge the family or owner for unit inspections [24 CFR 982.405(e)]. In the case of inspections of PHA-owned units, the PHA may compensate the independent agency from ongoing administrative fee for inspections performed. The PHA and the independent agency may not charge the family any fee or charge for the inspection [24 CFR.982.352(b)].

Notice and Scheduling

The family must allow the PHA to inspect the unit at reasonable times with reasonable notice [24 CFR 982.551(d)].

PHA Policy

Both the family and the owner will be given reasonable notice of all inspections. Except in the case of a life threatening emergency, reasonable notice is considered to be not less than 48 hours. Inspections may be scheduled between 8:00 a.m. and 7:00 p.m. Generally inspections will be conducted on business days only. In the case of a life threatening emergency, the PHA will give as much notice as possible, given the nature of the emergency.

Owner and Family Inspection Attendance

HUD permits the PHA to set policy regarding family and owner presence at the time of inspection [HCV GB p. 10-27].

PHA Policy

When a family occupies the unit at the time of inspection an adult family member must be present for the inspection. The presence of the owner or the owner's representative is encouraged but is not required.

At initial inspection of a vacant unit, the PHA will inspect the unit in the presence of the owner or owner's representative. If the owner or owner's representative cannot be present, PHA will inspect the unit on their own with the owner's permission. The presence of a family representative is permitted, but is not required.

The PHA will not charge a fee for failed re-inspections

8-II.B. INITIAL HQS INSPECTION [24 CFR 982.401(a)]

Timing of Initial Inspections

HUD requires the unit to pass HQS before the effective date of the lease and HAP Contract. HUD requires PHAs with fewer than 1,250 budgeted units to complete the initial inspection, determine whether the unit satisfies HQS, and notify the owner and the family of the determination within 15 days of submission of the Request for Tenancy Approval (RTA). For PHAs with 1,250 or more budgeted units, to the extent practicable such inspection and determination must be completed within 15 days. The 15-day period is suspended for any period during which the unit is not available for inspection [982.305(b)(2)].

PHA Policy

The PHA will complete the initial inspection, determine whether the unit satisfies HQS, and notify the owner and the family of the determination within 7-10 days of submission of the Request for Tenancy Approval (RTA).

The unit must pass the HQS inspection on or before the effective date of the HAP contract.

The PHA will not rely on alternative inspections and will conduct an HQS inspection for each unit prior to executing a HAP contract with the owner.

Inspection Results and Reinspections

PHA Policy

If any HQS violations are identified, the owner will be notified of the deficiencies and be given a time frame to correct them. If requested by the owner, the time frame for correcting the deficiencies may be extended by the PHA for good cause. The PHA will reinspect the unit within 5 business days of the date the owner notifies the PHA that the required corrections have been made.

If the time period for correcting the deficiencies (or any PHA-approved extension) has elapsed, or the unit fails HQS at the time of the reinspection, the PHA will notify the

owner and the family that the unit has been rejected and that the family must search for another unit. The PHA may agree to conduct a second reinspection, for good cause, at the request of the family and owner.

Following a failed reinspection, the family may submit a new Request for Tenancy Approval for the unit if the family has not found another unit by the time the owner completes all repairs and the family continues to wish to live in the unit.

Utilities

Generally, at initial lease-up the owner is responsible for demonstrating that all utilities are in working order including those utilities that the family will be responsible for paying.

PHA Policy

If utility service is not available for testing at the time of the initial inspection, the PHA will allow the utilities to be placed in service after the unit has met all other HQS requirements. The PHA will reinspect the unit to confirm that utilities are operational before the HAP contract is executed by the PHA.

Appliances

PHA Policy

If the family is responsible for supplying the stove and/or refrigerator, the PHA will allow the stove and refrigerator to be placed in the unit after the unit has met all other HQS requirements. The required appliances must be in place before the HAP contract is executed by the PHA. The PHA will execute the HAP contract based upon a certification from the family that the appliances have been installed and are working. A confirmatory inspection will be scheduled within 30 days of HAP contract approval.

8-II.C. ANNUAL HQS INSPECTIONS [24 CFR 982.405(a)]

Scheduling the Inspection

Each unit under HAP contract must be inspected biennially within 24 months of the last full HQS inspection.

PHA Policy

If an adult family member cannot be present on the scheduled date, the family should request that the PHA reschedule the inspection. The PHA and family will agree on a new inspection date that generally should take place within 5 business days of the originally-scheduled date. The PHA may schedule an inspection more than 5 business days after the original date for good cause.

If the family misses the first scheduled appointment without requesting a new inspection date, the PHA will automatically schedule a second inspection. If the family misses two scheduled inspections without PHA approval, the PHA will consider the family to have violated its obligation to make the unit available for inspection. This may result in termination of the family's assistance in accordance with Chapter 12.

8-II.D. SPECIAL INSPECTIONS [HCV GB p. 10-30]

The PHA will conduct a special inspection if the owner, family, or another source reports HQS violations in the unit.

PHA Policy

During a special inspection, the PHA generally will inspect only those deficiencies that were reported. However, the inspector will record any additional HQS deficiencies that are observed and will require the responsible party to make the necessary repairs.

If the annual inspection has been scheduled or is due within 90 days of the date the special inspection is scheduled the PHA may elect to conduct a full annual inspection.

8-II.E. QUALITY CONTROL INSPECTIONS [24 CFR 982.405(b); HCV GB p. 10-32]

HUD requires a PHA supervisor or other qualified person to conduct quality control inspections of a sample of units to ensure that each inspector is conducting accurate and complete inspections and that there is consistency in the application of the HQS.

The unit sample must include only units that have been inspected within the preceding 3 months. The selected sample will include (1) each type of inspection (initial, annual, and special), (2) inspections completed by each inspector, and (3) units from a cross-section of neighborhoods.

8-II.F. INSPECTION RESULTS AND REINSPECTIONS FOR UNITS UNDER HAP CONTRACT

Notification of Corrective Actions

The owner and the family will be notified in writing of the results of all inspections. When an inspection identifies HQS failures, the PHA will determine (1) whether or not the failure is a life threatening condition and (2) whether the family or owner is responsible.

PHA Policy

When life threatening conditions are identified, the PHA will immediately notify both parties by telephone, facsimile, or email. The notice will specify who is responsible for correcting the violation. The corrective actions must be taken within 24 hours of the PHA's notice.

When failures that are not life threatening are identified, the PHA will send the owner and the family a written notification of the inspection results within 5 business days of the inspection. The written notice will specify who is responsible for correcting the violation, and the time frame within which the failure must be corrected. Generally not more than 30 days will be allowed for the correction.

The notice of inspection results will inform the owner that if life threatening conditions are not corrected within 24 hours, and non-life threatening conditions are not corrected within the specified time frame (or any PHA-approved extension), the owner's HAP will be abated in accordance with PHA policy (see 8-II.G.). Likewise, in the case of family caused deficiencies, the notice will inform the family that if corrections are not made

within the specified time frame (or any PHA-approved extension, if applicable) the family's assistance will be terminated in accordance with PHA policy (see Chapter 12).

Extensions

For conditions that are life-threatening, the PHA cannot grant an extension to the 24 hour corrective action period. For conditions that are not life-threatening, the PHA may grant an exception to the required time frames for correcting the violation, if the PHA determines that an extension is appropriate [24 CFR 982.404].

PHA Policy

Extensions will be granted in cases where the PHA has determined that the owner has made a good faith effort to correct the deficiencies and is unable to for reasons beyond the owner's control. Reasons may include, but are not limited to:

A repair cannot be completed because required parts or services are not available.

A repair cannot be completed because of weather conditions.

A reasonable accommodation is needed because the family includes a person with disabilities.

The length of the extension will be determined on a case by case basis, but will not exceed 60 days, except in the case of delays caused by weather conditions. In the case of weather conditions, extensions may be continued until the weather has improved sufficiently to make repairs possible. The necessary repairs must be made within 15 calendar days, once the weather conditions have subsided.

Reinspections

PHA Policy

The PHA will conduct a reinspection immediately following the end of the corrective period, or any PHA approved extension.

The family and owner will be given reasonable notice of the reinspection appointment. If the deficiencies have not been corrected by the time of the reinspection, the PHA will send a notice of abatement to the owner, or in the case of family caused violations, a notice of termination to the family, in accordance with PHA policies. If the PHA is unable to gain entry to the unit in order to conduct the scheduled reinspection, the PHA will consider the family to have violated its obligation to make the unit available for inspection. This may result in termination of the family's assistance in accordance with Chapter 12.

8-II.G. ENFORCING OWNER COMPLIANCE

If the owner fails to maintain the dwelling unit in accordance with HQS, the PHA must take prompt and vigorous action to enforce the owner obligations.

HAP Abatement

If an owner fails to correct HQS deficiencies by the time specified by the PHA, HUD requires the PHA to abate housing assistance payments no later than the first of the month following the

specified correction period (including any approved extension) [24 CFR 985.3(f)]. No retroactive payments will be made to the owner for the period of time the rent was abated. Owner rents are not abated as a result of HQS failures that are the family's responsibility.

PHA Policy

The PHA will make all HAP abatements effective the first of the month following the expiration of the PHA specified correction period (including any extension).

The PHA will inspect abated units within 5 business days of the owner's notification that the work has been completed. Payment will resume effective on the day the unit passes inspection.

During any abatement period the family continues to be responsible for its share of the rent. The owner must not seek payment from the family for abated amounts and may not use the abatement as cause for eviction.

HAP Contract Termination

The PHA must decide how long any abatement period will continue before the HAP contract will be terminated. The PHA should not terminate the contract until the family finds another unit, provided the family does so in a reasonable time [HCV GB p. 10-29] and must give the owner reasonable notice of the termination. The PHA will issue a voucher to permit the family to move to another unit as described in Chapter 10.

PHA Policy

The maximum length of time that a HAP may be abated is 90 days. However, if the owner completes corrections and notifies the PHA before the termination date of the HAP contract, the PHA may rescind the termination notice if (1) the family still resides in the unit and wishes to remain in the unit and (2) the unit passes inspection.

Reasonable notice of HAP contract termination by the PHA is 30 days.

8-II.H. ENFORCING FAMILY COMPLIANCE WITH HQS [24 CFR 982.404(b)]

Families are responsible for correcting any HQS violations listed in paragraph 8.I.D. If the family fails to correct a violation within the period allowed by the PHA (and any extensions), the PHA will terminate the family's assistance, according to the policies described in Chapter 12.

If the owner carries out a repair for which the family is responsible under the lease, the owner may bill the family for the cost of the repair.

PART III: RENT REASONABLENESS [24 CFR 982.507]

8-III.A. OVERVIEW

No HAP contract can be approved until the PHA has determined that the rent for the unit is reasonable. The purpose of the rent reasonableness test is to ensure that a fair rent is paid for each unit rented under the HCV program.

HUD regulations define a reasonable rent as one that does not exceed the rent charged for comparable, unassisted units in the same market area. HUD also requires that owners not charge more for assisted units than for comparable units on the premises. This part explains the method used to determine whether a unit's rent is reasonable.

PHA-owned Units [24 CFR 982.352(b)]

In cases where an HCV family is receiving assistance in a PHA-owned unit, the PHA must obtain the services of an independent entity to determine rent reasonableness in accordance with program requirements, and to assist the family in negotiating the contract rent when the family requests assistance. A PHA-owned unit is defined as a unit that is owned by the PHA that administers the assistance under the consolidated ACC (including a unit owned by an entity substantially controlled by the PHA). The independent agency must communicate the results of the rent reasonableness determination to the family and the PHA. The independent agency must be approved by HUD, and may be the unit of general local government for the PHA jurisdiction (unless the PHA is itself the unit of general local government or an agency of such government).

8-III.B. WHEN RENT REASONABLENESS DETERMINATIONS ARE REQUIRED

Owner-initiated Rent Determinations

The PHA must make a rent reasonableness determination at initial occupancy and whenever the owner requests a rent adjustment.

The owner and family first negotiate the rent for a unit. The PHA (or independent agency in the case of PHA-owned units) will assist the family with the negotiations upon request. At initial occupancy the PHA must determine whether the proposed rent is reasonable before a HAP Contract is signed. The owner must not change the rent during the initial lease term. Subsequent requests for rent adjustments must be consistent with the lease between the owner and the family. Rent increases will not be approved unless any failed items identified by the most recent HQS inspection have been corrected.

PHA Policy

After the initial occupancy period, the owner may request a rent adjustment in accordance with the owner's lease. For rent increase requests after initial lease-up, the PHA may request owners to provide information about the rents charged for other units on the premises, if the premises include more than 4 units. In evaluating the proposed rents in comparison to other units on the premises the PHA will consider unit size and length of tenancy in the other units.

The PHA will determine whether the requested increase is reasonable within 30 calendar days of receiving the request from the owner. The owner will be notified of the determination in writing.

All rents adjustments will be effective the first of the month following 60 days after the PHA's receipt of the owner's request or on the date specified by the owner, whichever is later.

PHA- and HUD-Initiated Rent Reasonableness Determinations

HUD requires the PHA to make a determination of rent reasonableness (even if the owner has not requested a change) if there is a 5 percent decrease in the Fair Market Rent that goes into effect at least 60 days before the contract anniversary date. HUD also may direct the PHA to make a determination at any other time. The PHA may decide that a new determination of rent reasonableness is needed at any time.

PHA Policy

In addition to the instances described above, the PHA will make a determination of rent reasonableness at any time after the initial occupancy period if: (1) the PHA determines that the initial rent reasonableness determination was in error or (2) the PHA determines that the information provided by the owner about the unit or other units on the same premises was incorrect.

8-III.C. HOW COMPARABILITY IS ESTABLISHED

Factors to Consider

HUD requires PHAs to take into consideration the factors listed below when determining rent comparability. The PHA may use these factors to make upward or downward adjustments to the rents of comparison units when the units are not identical to the HCV-assisted unit.

- Location and age
- Unit size including the number of rooms and square footage of rooms
- The type of unit including construction type (e.g., single family, duplex, garden, low-rise, high-rise)
- The quality of the units including the quality of the original construction, maintenance and improvements made.
- Amenities, services, and utilities included in the rent

Units that Must not be Used as Comparables

Comparable units must represent unrestricted market rents. Therefore, units that receive some form of federal, state, or local assistance that imposes rent restrictions cannot be considered comparable units. These include units assisted by HUD through any of the following programs: Section 8 project-based assistance, Section 236 and Section 221(d)(3) Below Market Interest Rate (BMIR) projects, HOME or Community Development Block Grant (CDBG) program-assisted units in which the rents are subsidized; units subsidized through federal, state, or local tax credits; units subsidized by the Department of Agriculture rural housing programs, and units that are rent-controlled by local ordinance.

Note: Notice PIH 2010-18, issued May 10, 2010, provides further guidance on the issue of what constitutes an assisted unit.

Rents Charged for Other Units on the Premises

The Request for Tenancy Approval (HUD-52517) requires owners to provide information, on the form itself, about the rent charged for other unassisted comparable units on the premises if the premises include more than 4 units.

By accepting the PHA payment each month the owner certifies that the rent is not more than the rent charged for comparable unassisted units on the premises. If asked to do so, the owner must give the PHA information regarding rents charged for other units on the premises.

8-III.D. PHA RENT REASONABLENESS METHODOLOGY

This Reasonable Rent Policy and Procedures is to be added to the Section 8 Housing Choice Voucher Administrative Plan, and includes the following sections.

- I. Statement of Compliance
- II. Step-by-Step Explanation of Procedures
- III. Explanation of Analysis used in the Procedures
- IV. Compliance with Fair Housing Regulations
- V. Agency Staff Training
- VI. Agency's Interaction with Landlords
- VII. Agency-owned Units
- VIII. Data Collection of Unassisted Comparable Units
- IX. Calculation of the Recommended Reasonable Rent

I. Statement of Compliance with Reasonable Rent Regulations

Background

The EZ-Reasonable Rent Determination (EZ-RRD) system is utilized to assist staff to conduct reasonable rent analysis for units to be assisted. The EZ-RRD system was designed to correct long-standing misconceptions and problems about reasonable rent analysis. For example, other systems allow the Agency Analyst to select the comparable units, allowing for possible favoritism, subjectivity and Fair Housing Issues. EZ-RRD automatically selects the best comparable units in the database using consistent and objective methods. Thus, the Agency and U. S. Department of Housing and Urban Development (HUD) are protected from fraud, waste, and mismanagement.

In another example, some systems look for comparable units based only on the same or similar rents. They do not account for differences in the characteristics between the assisted and comparable units. The EZ-RRD system uses the standard deviation method to enable proper comparisons of the unit to be assisted and comparable units with different characteristics, assuring the Agency that an "apples-to-apples" comparison is made.

Agency should always ensure the EZ-RRD database has an adequate number of current comparable units in all communities in which the Participants live as well as communities that may provide Expanded Housing Opportunities. Expanded Housing Opportunities is a HUD term that indicates a geographic area that may offer better housing quality, good public transportation, good schools, close proximity to jobs and services, etc.

This Policy represents a reasonable method per the Section 8 Housing Choice Voucher and SEMAP regulations, as well as the HUD Housing Choice Voucher Program Guidebook. It also represents a common-sense approach according to the HUD SEMAP Confirmatory Review and Reasonable Rent Quality Assurance protocols.

Timing

A unit will not be approved until it is determined that the requested rent by the owner/agent is a reasonable rent. The Agency will also determine the reasonable rent before approving any increase in the rent or if there is a five percent (5%) decrease in the published FMR sixty (60) days before the contract anniversary as compared with the FMR in effect one year before the contract anniversary, or if directed by HUD. The agency may elect to re-determine reasonable rent at any other time.

Compliance with 24 CFR Section 982.507 Rent to Owner: Reasonable Rent and 24 CFR Section 985.3 (b) Reasonable Rent.

The regulations do not require a specific method to be utilized. The only requirements for comparability at 24 CFR 982.507 (b) is for the Agency to utilize unassisted units as comparable units and to consider all nine characteristics for each determination. Therefore, the reasonable rent system uses only unassisted units for comparable units. It also considers the following characteristics for each determination.

- Location
- Quality
- Size (by # of bedrooms, overall size and # of bathrooms)
- Unit type
- Age of the contract unit
- Amenities
- Housing services
- Maintenance
- Utilities to be provided by the owner

The only requirements for reasonable rent at 24 CFR 985.3 (b) is for the Agency to have and implement a reasonable written method that uses all nine of the above characteristics. This Policy describes the reasonable method herein.

The EZ-Reasonable Rent Determination (EZ-RRD) Report documents implementation of this Policy. This Policy includes an example of this Report.

II. Step-by Step Explanation of Procedures

This section first explains the preparation needed to perform reasonable rent determinations; then it provides the steps to implement the reasonable rent determinations.

Preparation: Use of Location

The first step in preparation concerns the location characteristic. Location has the greatest impact on rent. Therefore, this system gives the greatest weight to location.

To define location, the EZ-RRD Analysts divide the Agency's jurisdiction into three rental market value areas. Each unit to be assisted and each comparable unit is assigned to be in either a high, medium, or low rental market value location. Section III of this Policy provides an explanation of how these rental market values are determined.

Preparation: Assigning Maximum Value Points to HUD Required Characteristics

EZ-RRD assigns maximum value points to each HUD required characteristic. These value points represent the economic value for each characteristic. Section III of this Policy provides an explanation of how the value points are determined.

Value Point Levels Applied to Each Characteristic

Each characteristic is assigned a value point level. Characteristics with higher levels have more impact on the actual rent. Level V has the highest number of potential value points. Level I have the lowest number of potential points.

Each level has a value point range. The actual number of value points assigned to a characteristic is determined by the description of each characteristic in a particular unit. For example, for the quality characteristic, a unit with high quality will receive more value points than a unit with fair quality. The table below provides value levels and point ranges.

Characteristic	Value Point Level	Value Point Range
Location	V	15-23
HQS Quality	IV	10-18
Utilities Provided by Owner	IV	0-18
Building Structure (Unit Type)	IV	10-18
Overall Unit Size	III	8-13
Number of Bedrooms	II	4-9
Number of Bathrooms	II	4-9
Age	II	4-9
Amenities	II	0-9
Maintenance	I	1-5
Housing Services	I	0-5

Implementation

Below are step-by-step procedures for performing each reasonable rent determination. These procedures include data entry into the web-based EZ-RRD system and analysis performed by the system.

1. After the Agency Analyst enters the address for the Unit to be Assisted, EZ-RRD provides the Agency Analyst with the option to select the best comparable units by filtering.

If the Agency does not filter, EZ-RRD will select the best comparable units from the database for the Agency's entire jurisdiction. If the Agency does not find it necessary to filter, the Agency Analyst skips this option.

However, some agencies may have large jurisdictions that are comprised of smaller geographic areas that have significantly different rental market values. These agencies may wish to filter to select the best comparable units only from within a specific smaller geographical area.

If filtering is utilized, a two-step process is required. First, the Agency Analyst selects the Filter Type from a drop-down menu. The Filter Type may be city, state, zip code, census tract, real estate code, neighborhood, custom 1 and custom 2. After selecting the filter type, the Agency Analyst mouse-clicks in the *Filter To* field. EZ-RRD displays all the filtering options within the selected type. The Agency Analyst then selects the desired option. For example, some agencies may be comprised of several cities with significant rental market value differences. When the Agency Analyst selects filtering by city, all cities with comparable units will be displayed. The Agency Analyst then selects the desired city.

2. The Agency Analyst enters an accurate description of the unit to be assisted for each required characteristic. The Agency is responsible for accurate data input for each characteristic for the unit to be assisted. The Agency is responsible to confirm the accuracy of the data provided by the Landlord for the required characteristics. To ensure that accurate descriptions are entered the definitions for each description are provided on the system under “Help Me Decide” for each characteristic. In addition, these definitions are provided on a laminated guide called EZ-RRD Rent Reasonableness Determination Steps. It is provided in the detailed Reasonable Rent User’s Manual that is provided separate from this Policy.
3. Based on the descriptions entered into the EZ-RRD system, it assigns the appropriate values to each characteristic for the unit to be assisted.
4. EZ-RRD system totals the values of each characteristic for the unit to be assisted to obtain the unit’s Total Value Points.
5. EZ-RRD system analyzes the Total Value Points and descriptions of all characteristics for both the unit to be assisted and the comparable unit database. It locates units with exact points and characteristics to use as comparable units.
6. If there is no exact match, EZ-RRD system will next select comparables based on the database search priorities listed on the following chart.

Database Search Priorities Chart

Priority #	Action
I	Exact match on all 9 required characteristics and total value points
II	Exact match to structure type, location, # of bedrooms, and same or similar total value points for all required characteristics
III	Exact match to location, # of bedrooms, and same or similar total value points for all required characteristics

Through the above database search process, the three comparable units most similar to the unit to be assisted are selected.

7. EZ-RRD system then populates the Reasonable Rent Determination Report (hereafter called Report) with the characteristic descriptions and total value points for the unit to be assisted and each of the three comparables. See sample Report below.
8. The EZ-RRD System analyzes the data for the Average Rents of Comparables, Average Value of Comparables, Unit to be Assisted Rent and Unit to be Assisted Value factors. Based on this analysis, EZ-RRD calculates the estimated reasonable market rent for the unit to be assisted. On the EZ-Reasonable Rent Determination Report, this figure is called the Recommended Reasonable Rent.
9. On the top of the Report, EZ-RRD displays the following analysis data:
 - a. Average Rents of Comparables
 - b. Average Value of Comparables
 - c. Unit to be Assisted Rent
 - d. Unit to be Assisted Value
 - e. Recommended Reasonable Rent
10. The Agency Analyst reviews the five factors listed in the analysis data mentioned above. Based on this review, the Agency Analyst makes the final decision concerning reasonable rent. The Agency Analyst compares the Recommended Reasonable Rent figure with the Unit to be Assisted rent figure. Generally, if the Recommended Reasonable Rent figure is equal to or higher than the Unit to be Assisted rent, the Agency Analyst may determine the requested rent to be reasonable. The Agency Analyst may then select “Yes” on the Report, print it, and secure it in the tenant file. EZ-RRD will automatically fill in the Analyst’s name and date of the determination.

Generally, if the Recommended Reasonable Rent figure is less than the Unit to Be Assisted rent, the Agency Analyst may determine the rent is not reasonable. The Agency Analyst may then select “No” on the Report, print it, and secure it in the tenant file. EZ-RRD will automatically fill in the Analyst’s name and date of the determination.

If a Request for a Reasonable Accommodation is made, see Section IV – Compliance with Fair Housing Regulations in this Policy.

Sample Reasonable Rent Determination Report

A sample Reasonable Rent Determination Report is provided below. The Value Point level and the actual value assigned to each characteristic in this sample are also provided.

As needed an optional Reasonable Rent Determination Standard Deviation Adjusted Report showing standard deviation comparisons may be used. This optional report illustrates the results of standard deviation calculations for the characteristics of unit size, unit type, quality, and age if needed.

For illustration purposes only Red lettering does not appear on system-generated reports. Used here to illustrate values assigned.

EZ-Reasonable Rent Determination Report

Analysis Data:

Average Rent of Comparables:	\$1,289.67
Average Value of Comparables:	47
Unit To Be Assisted Rent:	\$900.00
Unit To Be Assisted Value:	47

Recommended Reasonable Rent:	\$1,289.67
The analysis of the above data shows the requested rent for the unit to be assisted to be reasonable?	Yes
If YES above, the Requested Rent is reasonable.

Although the EZ-Reasonable Rent Determination system is an aid to provide data and analysis, the Agency is solely responsible for the reasonable rent determination herein.

** Required in accordance with 24CFR§985.3(b)(3)(A)

III. Explanation of Types of Analysis used in the Procedures

The EZ-RRD system uses three basic methods of analysis. They are determining high, medium, and low Rental Market Value Areas, Assigning Value Points to Characteristics, and Standard Deviation calculation.

Determining High, Medium, and Low Rental Market Value Areas

High, medium, and low rental areas, or submarkets within the Agency's jurisdiction, are determined through a process called Value of the Unit's Location. EZ-RRD Analysts perform extensive economic research. This research identifies the value of rental property in all areas of the Agency's jurisdiction. This research entails examining many factors that affect property values and rental values within each submarket. These factors include but are not limited to census tract income levels, percent of population above or below poverty, median family income, renter occupied units, owner occupied units, percent of vacant units, median house age, crime statistics, public transportation, population impaction, community parks and other amenities, hospitals, airports, recreational facilities, waterfront access, recent real estate developments, etc.

These factors are used to evaluate the comparable unit or the unit to be assisted as well as the immediate three to four block area surrounding each comparable unit and unit to be assisted to assign a high, medium, or low rental market value rating to each comparable unit and each unit to be assisted.

The high rental market value area consists of luxury communities in the most favorable locations. These communities are usually newer construction and may have additional community/association amenities such as recreational facilities or be on a waterfront. Individual properties may include state-of-the-art systems, modern appliances, and/or superior quality finishes.

A medium rental market value area is considered an average neighborhood or intermediate community. These areas are slightly less favorable than the luxury areas. These communities may include newer, larger homes and may include quality finishes. These areas may have additional amenities such as a fitness center, swimming pool, and recreational courts. Properties would contain adequate systems and appliances.

The lower rental market value area is a below average neighborhood, ranging from minimal to depleted or impoverished areas. Minimal communities often include older, smaller homes in good condition (that would be considered starter homes if being purchased). They may also include buildings in poor condition that have been abandoned or vandalized. These neighborhoods may have community parks and swimming pools.

Assigning Value Points to Characteristics

The value for each characteristic is based upon the economic research for the Agency's jurisdiction described above. In addition, it is based on several years of rental market research using an enormous, national, unassisted rental market unit sampling. Each HUD required characteristic was individually analyzed to represent its contribution accurately to the unit's total rental value. The specific values used are proprietary and cannot be disclosed.

For example, the Agency gives the highest weight to location. Higher weights are also given to utilities paid for by the landlord, quality, and unit type. The lowest values are given to maintenance and services.

The value points for each characteristic are added for each unit to become the Total Value Point rating. This rating represents the unit's actual rental value. The Total Value Points for the unit to be assisted are compared with the Average Total Value Points for the three comparable units during the reasonable rent determination process. This process is illustrated on the sample Reasonable Rent Report provided above.

This methodology is also supported by the Housing Choice Voucher Program HUD Guidebook. This Guidebook refers to the Point and Dollars per Feature System.

Standard Deviation Calculations

The EZ-RRD system uses the standard deviation procedure to compare differing characteristics between the unit to be assisted and the comparable units. Standard Deviation uses the value points assigned to each characteristic to calculate the appropriate rent for units having different characteristics. The following examples illustrate how the EZ-RRD system applies the standard deviation calculation.

1. The high-quality characteristic has a value of 16 points. The fair quality characteristic has a value of 13 points, a 19% difference ($16 - 13 = 3$ point difference; $3 \text{ points} \div 16 \text{ points} = 19\%$). If the other characteristics are the same and if the high-quality unit rents for \$1,000, the fair quality unit should rent at \$810.00 or 19% less.
2. The single-family structure type characteristic has a value of 18 points. The garden/walkup structure type characteristic receives 15 points or 17% less. If the other characteristics are the same, and the single-family unit rents for \$1,200.00, the garden/walkup unit should rent for \$996.00, or 17% less.

The above calculation is made for each characteristic with different descriptions during each reasonable rent determination. The results of these standard deviation calculations are presented in the Total Value Points. For example, using the sample Reasonable Rent Determination above, the following Total Value Points and rents were listed:

Average Total Value Points of Comparables:	78
Average Rents of Comparables:	\$738.00
Total Value Points of Assisted Unit:	78
Requested Rent of Assisted Unit	\$925.00

After applying the standard deviation calculations, this system determined that the average comparable units and the unit to be assisted had the same total value. As the requested rent for the unit to be assisted unit is higher than the average of the comparable units, the requested rent is not reasonable.

This method is described in the HUD HCVP Guidebook, pages 9 to 10. It states the Analyst may need to review the database for (a) same number of bedrooms and building type but in a broader geographic location or (b) have the same number of bedrooms, are in the same geographic location, but are in other types of buildings. In addition, the HUD HCVP Guidebook provides the following example:

The proposed program unit is located in geographic Area A, has three bedrooms, and is a garden apartment. The proposed rent is \$1,220.00. There are no other garden apartments in Area A in the database. If there are other garden apartments in Area A, the analyst might try to obtain information about them. However, if there are no other garden apartments in Area A, then the analyst might look at 3 bedroom single family homes in Area A and compare them with information on both garden apartments and single family homes in nearby Area B. The information found (all rents are gross rents) is:

Unit	Area A	Area B
3-bedroom garden apartment	(None)	\$1,400.00
3 bedroom single family home	\$1,400.00	\$1,600.00

The single family homes in Area B (that are similar to those in the database for Area A) are about 14 percent higher than garden apartments in Area B. If one estimates a rent for a garden apartment in Area A is 14 percent below that of the single family homes in Area A the result is \$1,228.00. Assuming the other factors for comparison are generally equal, this should provide one indication that the proposed rent is comparable.

IV. Compliance with Fair Housing Regulations

The Agency will ensure the reasonable rent determination process is not utilized to violate anyone's fair housing rights. To accommodate a request for a reasonable accommodation, the Agency recognizes the Fair Housing regulations are more strict than the reasonable rent regulations. Therefore, the fair housing regulations will take precedence.

A participant may make a request for a reasonable accommodation when the EZ-RRD Report shows the rent is not reasonable or when the rent is so high the Participant would pay more than 40% of their monthly adjusted income toward the rent (24 CFR Part 982.508 – Maximum Family Share at Initial Occupancy). The Agency will take reasonable internal and external administrative remedies to grant regulatorily acceptable requests for a reasonable accommodation when said requests are received.

Internal administrative remedies are efforts completely within the Agency's control. As needed, the internal administrative remedies described below will be considered.

As a reasonable accommodation, the Agency may give a higher rating to four of the required reasonable rent characteristics as described below. These higher ratings may result in a higher total value of the unit to be assisted, and thus enables the EZ-RRD software to identify comparable units that may justify a higher rent.

Concerning the location characteristic, the staff should review the definitions for the rental market value area to be sure the most accurate rental market value area is being considered for the unit to be assisted.

Concerning the quality characteristic, the Agency may give a unit with features that address a specific disability an "Excellent" quality rating.

Concerning the amenities characteristic, the actual features that address a disability are considered amenities. The Agency may select the "Handicap Accessible" amenity and add one additional amenity in "Other."

Concerning the landlord provided services characteristic, if the unit has services that aid people with disabilities, such as transportation, extra security, meals and package handling, the Agency can select "Landlord Provided Services."

When the request for a reasonable accommodation concerns the 40% of the Monthly Adjusted Income (MAI) rule, the Agency may consider the internal administrative remedy of using a payment standard of 120% of the Fair Market Rent for the specific unit and participant in question (24 CFR 982.503 b. (1.) (v.)). The Agency does not need HUD approval for this action. The higher payment standard may bring the tenant's rent share to under 40% of MAI thus allowing the Agency to approve the requested rent.

External administrative remedies involve efforts by the Agency and HUD. If the requested gross rent for a unit at initial occupancy exceeds the payment standard, and the tenant would pay more than 40% of their monthly adjusted income for rent, the Agency may request a waiver from HUD for the regulation at 24 CFR Part 982.508 – Maximum Family Share at Initial Occupancy. The waiver request would be to allow the family to pay more than 40% of their monthly adjusted income for rent.

As needed, another external administrative remedy the Agency will consider is to request a waiver from HUD from the regulation at 24 CFR Part 982.507 Rent to Owner’s Reasonable Rent. This waiver request would be to approve the rent for the unit in question even though it is not reasonable. (This section subject to change if cited regulations are changed or updated.)

V. Agency Staff Training

As new analysts and new supervisors are appointed, they will undergo training concerning the reasonable rent requirements and the EZ-RRD system. This training will include a review of:

- 24 CFR Section 982.507 Rent to Owner: Reasonable Rent
- 24 CFR Section 985.3 (b) Reasonable Rent
- HUD Housing Choice Voucher Program Guidebook Chapter 9
- Reasonable Rent Policy
- EZ-RRD Procedures

The Analyst performing reasonable rent determinations will demonstrate proficiency for correctly performing the reasonable rent determination.

VI. Agency Interaction with Landlords

Owner/Agent Relations

The owner/agent will be advised by accepting each monthly housing assistant payment he/she will be certifying that:

- The Rent to Owner is not more than rent charged by the owner/agent for comparable unassisted units in the premises.
- The assisted family is currently occupying the unit and the assisted family is not in violation of lease obligations.

Owner/Agency Negotiations

If owners object to the approved rent, they may submit all HUD required comparable data for at least three unassisted units. The data will be confirmed by the Agency and added to the existing comparable units database. The Agency will then run a new determination.

VII. Agency-Owned Units

Local government or independent entities (approved by HUD) must perform rent reasonableness determinations for Agency owned units leased by voucher holders. In these cases, the following arrangements may be made:

- The Authority may pay expenses associated with this service.
- The Authority may use administrative fee income to compensate the independent agencies for their services.
- The family cannot be charged for these services.

VIII. Collection of Unassisted Comparable Units

Data for comparable units may be collected from the following sources:

- Onsite visits
- Real estate, Landlord/real estate investor groups, property managers
- Any publication with real estate ads
- Available Census Reports for the most recent years
- Various Internet sources
- Multiple Listing Service
- Newspaper ads followed by owner/agent interviews
- Owner/agent questionnaires
- Apartment and home rental guides
- Fair Housing groups
- Government sources
- Other method

IX. Calculation of the Recommended Reasonable Rent

The EZ-RRD System automatically calculates the Recommended Reasonable Rent figure and prints that figure on the EZ-Reasonable Rent Determination Report (RRD). The Recommended Rent figure is determined through two automated calculations. First, The Average Rents of Comparables is divided by the Average Value of Comparables to obtain the average dollar value per value point of the comparable units. Second, this average dollar values is multiplied by the unit to be assisted value points to obtain the recommended rent.

The staff person performing the RRD compares the Recommended Reasonable Rent figure with the Unit to be Assisted Rent figure. If the recommended rent is equal or

higher than the unit to be assisted rent, the requested rent is reasonable. The staff person marks “YES” on the RRD.

If the Recommended Rent is lower than the Unit to be Assisted rent, the request rent is not reasonable. The staff checks “NO” on the RRD and follows the process for unreasonable rent requests.

EXHIBIT 8-1: OVERVIEW OF HUD HOUSING QUALITY STANDARDS

Note: This document provides an overview of HQS. For more detailed information see the following documents:

- 24 CFR 982.401, Housing Quality Standards (HQS)
- Housing Choice Voucher Guidebook, Chapter 10.
- HUD Housing Inspection Manual for Section 8 Housing
- HUD Inspection Form, form HUD-52580 (3/01) and Inspection Checklist, form HUD-52580-A (9/00)

Sanitary Facilities

The dwelling unit must include sanitary facilities within the unit. The sanitary facilities must be usable in privacy and must be in proper operating condition and adequate for personal cleanliness and disposal of human waste.

Food Preparation and Refuse Disposal

The dwelling unit must have space and equipment suitable for the family to store, prepare, and serve food in a sanitary manner.

Space and Security

The dwelling unit must provide adequate space and security for the family. This includes having at least one bedroom or living/sleeping room for each two persons.

Thermal Environment

The unit must have a safe system for heating the dwelling unit. Air conditioning is not required but if provided must be in proper operating condition. The dwelling unit must not contain unvented room heaters that burn gas, oil, or kerosene. Portable electric room heaters or kitchen stoves with built-in heating units are not acceptable as a primary source of heat for units located in climatic areas where permanent heat systems are required.

Illumination and Electricity

Each room must have adequate natural or artificial illumination to permit normal indoor activities and to support the health and safety of occupants. The dwelling unit must have sufficient electrical sources so occupants can use essential electrical appliances. Minimum standards are set for different types of rooms. Once the minimum standards are met, the number, type and location of electrical sources are a matter of tenant preference.

Structure and Materials

The dwelling unit must be structurally sound. Handrails are required when four or more steps (risers) are present, and protective railings are required when porches, balconies, and stoops are thirty inches or more off the ground. The elevator servicing the unit must be working [if there is one]. Manufactured homes must have proper tie-down devices capable of surviving wind loads common to the area.

Interior Air Quality

The dwelling unit must be free of air pollutant levels that threaten the occupants' health. There must be adequate air circulation in the dwelling unit. Bathroom areas must have one openable window or other adequate ventilation. Any sleeping room must have at least one window. If a window was designed to be opened, it must be in proper working order.

Water Supply

The dwelling unit must be served by an approved public or private water supply that is sanitary and free from contamination. Plumbing fixtures and pipes must be free of leaks and threats to health and safety.

Lead-Based Paint

Lead-based paint requirements apply to dwelling units built prior to 1978 that are occupied or can be occupied by families with children under six years of age, excluding zero bedroom dwellings. Owners must:

- Disclose known lead-based paint hazards to prospective tenants before the lease is signed,
- provide all prospective families with "Protect Your Family from Lead in Your Home",
- Stabilize deteriorated painted surfaces and conduct hazard reduction activities when identified by the PHA
- Notify tenants each time such an activity is performed
- Conduct all work in accordance with HUD safe practices
- As part of ongoing maintenance ask each family to report deteriorated paint.

For units occupied by environmental intervention blood lead level (lead poisoned) children under six years of age, a risk assessment must be conducted (paid for by the PHA). If lead hazards are identified during the risk assessment, the owner must complete hazard reduction activities.

See HCV GB p. 10-15 for a detailed description of these requirements. For additional information on lead-based paint requirements see 24 CFR 35, Subparts A, B, M, and R.

Access

Use and maintenance of the unit must be possible without unauthorized use of other private properties. The building must provide an alternate means of exit in case of fire.

Site and Neighborhood

The site and neighborhood must be reasonably free from disturbing noises and reverberations, excessive trash or vermin, or other dangers to the health, safety, and general welfare of the occupants.

Sanitary Condition

The dwelling unit and its equipment must be in sanitary condition and free of vermin and rodent infestation. The unit must have adequate barriers to prevent infestation.

Smoke Detectors

Smoke detectors must be installed in accordance with and meet the requirements of the National Fire Protection Association Standard (NFPA) 74 (or its successor standards). If the dwelling unit is occupied by any person with a hearing impairment, smoke detectors must have an appropriate alarm system as specified in NFPA 74 (or successor standards).

Hazards and Health/Safety

The unit, interior and exterior common areas accessible to the family, the site, and the surrounding neighborhood must be free of hazards to the family's health and safety.

<p style="text-align: center;">EXHIBIT 8-2: SUMMARY OF TENANT PREFERENCE AREAS RELATED TO HOUSING QUALITY</p>
--

Note: This document provides an overview of unit and site characteristics and conditions for which the family determines acceptability. For more detailed information see the following documents:

- Housing Choice Voucher Guidebook, Chapter 10.
- HUD Housing Inspection Manual for Section 8 Housing
- HUD Inspection Form, form HUD-52580 (3/01) and Inspection Checklist, form HUD-52580-A (9/00)

Provided the minimum housing quality standards have been met, HUD permits the family to determine whether the unit is acceptable with regard to the following characteristics.

- *Sanitary Facilities.* The family may determine the adequacy of the cosmetic condition and quality of the sanitary facilities, including the size of the lavatory, tub, or shower; the location of the sanitary facilities within the unit; and the adequacy of the water heater.
- *Food Preparation and Refuse Disposal.* The family selects size and type of equipment it finds acceptable. When the family is responsible for supplying cooking appliances, the family may choose to use a microwave oven in place of a conventional oven, stove, or range. When the owner is responsible for providing cooking appliances, the owner may offer a microwave oven in place of an oven, stove, or range only if other subsidized and unsubsidized units on the premises are furnished with microwave ovens only. The adequacy of the amount and type of storage space, the cosmetic conditions of all equipment, and the size and location of the kitchen are all determined by the family.
- *Space and Security.* The family may determine the adequacy of room sizes and room locations. The family is also responsible for deciding the acceptability of the type of door and window locks.
- *Energy conservation items.* The family may determine whether the amount of insulation, presence of absence of storm doors and windows and other energy conservation items are acceptable.
- *Illumination and Electricity.* The family may determine whether the location and the number of outlets and fixtures (over and above those required to meet HQS standards) are acceptable or if the amount of electrical service is adequate for the use of appliances, computers, or stereo equipment.

- *Structure and Materials.* Families may determine whether minor defects, such as lack of paint, or worn flooring or carpeting will affect the livability of the unit.
- *Indoor Air.* Families may determine whether window and door screens, filters, fans, or other devices for proper ventilation are adequate to meet the family's needs. However, if screens are present they must be in good condition.
- *Sanitary Conditions.* The family determines whether the sanitary conditions in the unit, including minor infestations, are acceptable.
- *Neighborhood conditions.* Families may determine whether neighborhood conditions such as the presence of drug activity, commercial enterprises, and convenience to shopping will affect the livability of the unit.

Families have no discretion with respect to lead-based paint standards and smoke detectors.
